We welcome photovoltaic self-consumption

CEVICA, in our desire for continuous improvement, we have just made an important investment for our future and the environment.

In the summer of 2021 we changed the roof of the factory to be able to adapt it and install a 105 kWp solar plant. With this solar plant we will be able to supply a good part of our energy consumption in a clean way, considerably reducing CO2 emissions.

After all, we only have one Earth and we have to take care of it.
